This keeps the system useful without adding too much overhead.

Questions (to tailor it to your workflow)

â¢ What tools do you use daily? (Revit/ArchiCAD, Bluebeam, Outlook/Gmail, Teams/Zoom, Notion/Obsidian, etc.)
â¢ What are your most common â repeat writingâ tasks (RFIs, site reports, emails, meeting minutes, specs)?
â¢ Where do you lose the most time: searching for info, writing, coordination, or QA/consistency checks?
â¢ Do you want this for personal use only, or shared across a team/office?
â¢ Are there confidentiality constraints (client NDAs) that require everything to stay local?
â¢ What would â successâ look like in 2 weeks (e.g., save 2 hours/week on admin)?
